I'm concerned we would raise a fracas early on in the process. Let's hold on outsiders until we have something more substantial. (Then, we'll put Tim and Matt Rose together!)

What about an adjacent neighborhood rep.? Someone on Garden Street?

No comments. I would include the chair of the parking task force, a student (Nova), and a faculty member, in addition to the technical folks you might think helpful.

I will be trying to wrap this up tomorrow in order to advertise this weekend. Are there any additional comments?

Some general issues:

We need to establish the consultant selection committee and get their commitment to the schedule. Any thoughts on membership?

Jim, what budget code should I use for the advertisements and copying of RFQ?

Lastly, I've developed an early draft budget (attached) just to make sure everyone realizes the potential magnitude of the predesign.
